Last Projects

Wednesday

A single page, End-to-End application - 'Monday' clone. build within two weeks collaboration project (3 members). powered with React.js client-side & Node.js server-side and stored data with MongoDB.
Responsive Layout and Designed pixel perfect with Sass pre-processor.
For the state management we used Redux and Thunk.

Live Site │ **Github Repo**

Appsus

A single-page application, with a set of mini-apps.
Build within 3 days - my first project of React.js.
Designed with CSS3 using Flex and Grid.
The website is starting with demo data and save changes on localStorage.
Email 'clone' - full CRUD implemented on emails.
Keep 'clone' - full CRUD on notes, todos, and images links
Book shop - Adding reviews and rating to book list
